EDUCATION

Carleton University, Ottawa, Ontario

September 2020 – December 2025

Bachelor of Computer Science with High Distinction, Minor in Psychology, Co-operative Education

- CGPA: 10.45/12
- Relevant Coursework: Algorithms, Data Structures, Operating Systems, Databases, Computer Networks
- Awards: Dean's Honour List (2020-2023), A. Davidson Dunton Scholarship (2021-2022)

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C#, C++, C, JavaScript
- **Frameworks & Web:** ASP.NET, React (Vite), HTML, CSS
- **Backend & Systems:** REST APIs, TCP/IP sockets, client-server architecture, authentication
- **Databases:** SQL Server, SQLite
- **Tools & Platforms:** Git, Linux, Bash, IIS, debugging tools
- **Cloud & DevOps:** Docker (Learning), CI/CD Fundamentals, Azure (Learning)
- **Other:** DITA XML, Adobe FrameMaker

WORK EXPERIENCE

Full Stack Developer

September 2023 – August 2024

Royal Canadian Mounted Police (RCMP), Ottawa, ON

- Developed and maintained ASP.NET (C#) web applications and REST APIs supporting 100+ internal users
- Optimized SQL Server queries to improve application performance and support efficient retrieval of operational data
- Built backend services and business logic used to streamline internal workflows and application functionality
- Diagnosed and resolved production issues within IIS environments, improving application reliability and user experience
- Collaborated with developers, analysts, and stakeholders in Agile teams to design, test, and deploy new features
- Performed testing, code reviews, and version control using Git to maintain code quality and deployment readiness

Product Content Developer Intern

May 2025 – December 2025

Ciena, Ottawa, ON

- Created structured technical content using DITA XML and Adobe Experience Manager (AEM) across multiple enterprise software releases
- Partnered with software engineers and product teams to validate system functionality and technical accuracy
- Converted product demonstrations and engineering workflows into searchable, reusable technical resources
- Managed content versioning, publishing workflows, and release documentation across multiple product teams

TECHNICAL PROJECTS

Library Book Data Log System (C, TCP/IP Socket, Client-Server Networking)

- Designed and implemented a client-server system using TCP/IP sockets, enabling communication between multiple clients and a central server
- Debugged memory and socket issues using Linux tools
- Ensured reliability under concurrent user requests

Multithreaded Simulation Engine (C, Concurrency & Synchronization)

- Built a multithreaded simulation using mutexes and semaphores for safe concurrency
- Designed custom data structures including a linked-list-based deque
- Simulated combat scenarios and generated statistical performance outcomes
- Resolved race conditions and ensured thread-safe execution using Linux debugging tools

Personal Portfolio Website (*React, Vite, JavaScript*)

- Designed and deployed a responsive portfolio using React and Vite
- Implemented responsive UI components and optimized page responsiveness across desktop and mobile devices
- Deployed using Vercel with custom domain integration
- Continuously enhanced with new projects, features, and responsive UI improvements

Nourivia - Full Stack Support Services Platform (*React, Node.js, Express*)

- Designing a platform intended to help users discover food assistance, hygiene support, and community resources based on location and eligibility
- Planning RESTful API architecture and filtering functionality to support service discovery
- Researching data structures and service categorization approaches to improve accessibility and searchability
- Using Git and iterative development practices to guide project implementation

VOLUNTEER EXPERIENCE

In-Office Volunteer

November 2022 - Present

Unified Support Centre, Carleton University Students' Association, Ottawa, ON

- Prepared and distributed food hampers and essential supplies for students in urgent need through the Emergency Essential Assistance Program
- Conducted safe walks by escorting individuals to their destinations, ensuring safety and well-being
